BX385810

BX385810 Homo sapiene PLACENTA COT 25-NORMALIZED Homo sapiens CDNA clone CS0DI005YB10 5-PRIME, mRNA sequence.

BX385810

BX385810.1 GI:30455372

EST.

Homo sapiens (human)
/clone="CSODIO78YO10"
/tissue type="PLACENTA COT 25-NORMALIZED"
/clone lib="Homo Bapiens PLACENTA COT 25-NORMALIZED"
/clone lib="Homo Bapiens PLACENTA COT 25-NORMALIZED"
/note="Ist strand cDNA was primed with a NotI-oligo(dT)
primer. Five prime end enriched, double-strand cDNA was digested with Not I and cloned into the Not I and BcoR V sites of the pCMVSPORT 6 vector. Library was normalized.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      Length:

//note="Organ: Stomach; Vector: pCNS; Site_1: EcoRI;
Site_2: NotI; The poly (A) + RNA was dephosphorylated with bacterial alkaline phosphatase (BAP) and then decapped with tabacco acid pyrophosphatase (TAP). The decapped intact mRNA was ligated with DNA-RNA linker including EcoRI site by treatment of T4 RNA ligase and the first strand cDNA was synthesized from oligo dT-selected mRNA by priming with dT-tailed vector. The dT-tailed vector was adjusted to have about 60nt. The cDNA vector was circularized with B. coli DNA ligase after digestion of EcoRI which site is also included in vector. An RNA strand converted to a DNA strand by Okayama-Berg method. The obtained cDNA vectors were used for transformation of competent cells E. coli Top10f' by electroporation method. The cDNA libraries constructed by this method are full-length enriched cDNA library."

/note="Organ: Prostate; Vector: pT7T3 Pac; Site_1: EcoR I; Site_2: Not I; The library was constructed according Bonaldo, Lennon and Soares, Genome Research, 6:791-806, 1996. Denatured RNA was size fractionated on a 1% agarose gel. First strand cDNA synthesis was primed with oligo-dT primer containing a Not I site. Double strand cDNA was size selected according to mRNA size fraction, ligated with EcoR I adaptor, digested with Not I and then cloned directionally into pT7T3 Pac vector. The library tag sequence located between the Not I site and the polyA tail is CCCAC. Tissue was provided by Tim Ratlift."
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                BX334952

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           oAspala
                                                                                                                                                                                                                                                                                                                                                                                                                    RESULT 9
US-09-159-812-14/c
; Sequence 14, Application US/09159812A
; Patent No. 6613872
; GENERAL INFORMATION:
; APPLICANT: Xu, Jiangchun
; APPLICANT: Dillon, Davin C.
; TITLE OF INVENTION: COMPOUNDS FOR IMMUNOTHERAPY OF
; TITLE OF INVENTION: PROSTATE CANCER AND METHODS FOR THEIR USB
; FILE REFERENCE: 210121.428C5
; CURRENT APPLICATION NUMBER: US/09/159,812A
; CURRENT FILING DATE: 1998-09-23
; NUMBER OF SEQ ID NOS: 306
; SOFTWARE: FastSEQ for Windows Version 3.0
; SEQ ID NO 14
; LENGTH: 816
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        AsnGlyCysCysIleAspSerPheLeuGluCysAspAspThrProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsnCysProAsn

Sequence 14, Application US/09352616A;
Patent No. 6395278;
GENERAL INFORMATION:
APPLICANT: Dillon, Davin C.
APPLICANT: Harlocker, Susan Louise
APPLICANT: Aiang, Yuqui
APPLICANT: Aiang, Yuqui
APPLICANT: Mitcham, Jennifer Lynn
ITTLE OF INVENTION: OPPROSTATE CANCER AND DIAGNOSIS
ITTLE OF INVENTION: OP PROSTATE CANCER AND METHODS FOR THEIR USF
ITTLE OF INVENTION UNMBER: US/09/352,616A;
CURRENT APPLICATION NUMBER: US/09/352,616A;
CURRENT FILING DATE: 1999-07-13
NUMBER OF SEQ ID NOS: 472
SOFTWARE: FastSEQ for Windows Version 3.0

US-09-159-812-14/C
US-09-159-812-14/C
Sequence 14, Application US/09159812A
Patent No. 6613872
GENERAL INFORMATION:
APPLICANT: Xu, Jiangchun
APPLICANT: Xu, Jiangchun
APPLICANT: Dillon, Davin C.
TITLE OF INVENTION: COMPOUNDS FOR IMMUNOTHERAPY OF
TITLE OF INVENTION: PROSTATE CANCER AND METHODS FOR
FILE REFERENCE: 210121.428C5
CURRENT APPLICATION NUMBER: US/09/159,812A
CURRENT FILING DATE: 1998-09-23
NUMBER OF SEQ ID NOS: 306
SOFTWARE: FastSEQ for Windows Version 3.0
SEQ ID NO 14
LENGTH: 816
TYPE: DNA
ORGANISM: Homo sapien
FEATURE:
NAME/KEY: misc feature
LOCATION: (1)...(816)
OTHER INFORMATION: n = A,T,C or G

US-09-232-149A-14/c

Sequence 14, Application US/09232149A

Patent No. 6465611

GENERAL INFORMATION:
APPLICANT: Xu, Jiangchun
APPLICANT: Dillon, Davin C.
APPLICANT: Mitcham, Jennifer Lynn
TITLE OF INVENTION: COMPOUNDS FOR IMMUNOTHERAPY OF PROSTATE
TITLE OF INVENTION: CANCER AND METHODS FOR THEIR USE
FILE REFERENCE: 210121.427C6
CURRENT APPLICATION NUMBER: US/09/232,149A

CURRENT FILING DATE: 1999-01-15
NUMBER OF SEQ ID NOS: 338

SOFTWARE: FastSEQ for Windows Version 3.0
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         Length
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              Indels

US-09-115-453-14/c
Sequence 14, Application US/09115453B
Patent No. 6657056
GENERAL INFORMATION:
APPLICANT: Xu, Jiangchun
APPLICANT: Dillon, Davin C.
TITLE OF INVENTION: COMPOUNDS FOR IMMUNO
TITLE OF INVENTION: METHODS FOR THEIR US
FILE REFERENCE: 210121.427C4
CURRENT APPLICATION NUMBER: US/09/115,45
CURRENT FILING DATE: 1998-07-14
NUMBER OF SEQ ID NOS: 228
SOFTWARE: FastSEQ for Windows Version 3.
LENGTH: 816
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           m
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      \mathbf{c}
